

# The Bengston Energy Healing Method™

with William Bengston, Ph.D

*Can energy healing really cure cancer?*

*Is it possible for you to heal someone's terminal illness with your bare hands?*

After 35 years of extraordinary research, Dr. William Bengston has demonstrated time and again that hands-on healing works, even on some conditions that have no conventional treatment. In this three-day, highly experiential workshop, Dr. Bengston teaches in-depth training in the method that produces tangible results in the laboratory, The Bengston Energy Healing Method™. He theorizes that a unique process he calls "image cycling" may be key to accessing healing potential so that the body can restore itself to its natural state of wholeness.

No special beliefs or previous training in energy modalities are required -- "image cycling" is a skill anyone can learn and circumvents our conscious limitations to access a deeper source of profound healing intelligence. This is a weekend of practical, step-by-step instruction that also includes techniques for distance healing, instilling healing energy into objects, and more.

## Who might be interested in attending?

*Healing Touch & reiki practitioners, yoga teachers, doctors/nurses, meditators of all backgrounds, people curious about healing, people interested in improving their own health & well-being, you!*
